OUR INGREDIENTS

At Epol & Equus we pride ourselves in using only the best ingredients, ensuring that all products are nutritionally complete and are formulated to fulfil all the nutritional requirements for its specific application.

Both brands are registered AFMA (Animal Feed Manufacturers Association) members and comply with their strict code of conduct in all aspects of our manufacturing.

As SA's leading feed manufacturer, Epol implements world wide standards to ensure safe food supply chains both internationally and at home.

The use of Near-Infrared Spectroscopy (NIR) allows us to analyse raw materials, in processed products, as well as finished products.

This facilitates stringent controls of incoming raw materials and ingredients to maximise quality and to assist in achieving a strict consistency in all our finished products. On-going research and development ensure that our products remain at the forefront of feed technology, giving owners economical input costs with maximum yield.

With a committed team of expert nutritionists and highly motivated staff, who continually strive for excellence, our equine range is able to cater for a wide variety of needs.

EPOL AND EQUUS = THE PERFECT BALANCE

With more than 100 years of experience in the feed industry, Epol has withstood the test of time continuously adding value to the performance of your horse. Equus brings a strength to the partnership that is rooted in principles of natural feeding techniques. With the latest research Epol and Equus provide the next level in equine nutrition.

OUR FOCUS

- Digestive health
- Performance
- Muscle development
- Bone development
- Recovery
- Quality fibres

Feeding horses correctly requires a good eye and careful monitoring of a horses' condition and behaviour.

It is recommended that all horses should have a minimum of 1.5% of body weight per day in good quality roughage. Concentrates should be fed according to the horses age, condition, workload and quality of roughage. No more than 2.5kg of concentrates should be fed per meal. Fresh water must be available at all times. Always introduce any new feed or roughage over 7-14 days adjusting the amount required incrementally.

With many products to choose from this can be confusing, we therefore recommend you contact us for a recommendation based on your horses' individual needs.

We offer Free at home/yard visits with no obligation to buy.
