

Epol High Performance Balancer is a highly nutritious, low intake pellet that is designed for a wide range of applications including supporting the stud and performance horse through various phases including breeding, training, competition and recovery. It is also ideal for working “good-doers” that don’t require the recommended level of concentrate and so may be falling short on the required vitamin and mineral intake. This nutrient dense product contains all the vitamins, minerals and quality protein sources needed to support optimum health and vitality as well as maintaining muscle tone and topline in the performance horse.

Suitable for a wide variety of uses from stud application to performance horses.

- **The inclusion of an acid buffer helps to create the optimum gut environment to support the digestive system of horses with hind-gut acidosis and EGUS.**
- **Low in sugar and starch making it suitable for horses sensitive to such ingredients.**
- **Includes a yeast culture (*saccharomyces cerevisiae*) which has been proven to enhance animal performance and aid digestive health.**
- **Antioxidants to aid in muscle recovery.**

Roughage should be provided at 1.5% of bodyweight per day. The amount of High Performance Balancer fed will be dependent on each individual.

Available in a 22.5 kg bag.

Should be stored in a cool, dry area under roof and out of direct sunlight.

This product has a shelf life of 6 months from the date of manufacture.
